

ESS Lithium Battery Boxes

ESS Lithium Battery Enclosure

Designed for advanced Energy Storage Systems (ESS), these enclosures provide safe, efficient, and reliable housing for high-capacity lithium battery packs. Ideal for residential, commercial, and industrial energy storage applications.

Voltage: 48V / 51.2V

Capacity: 100Ah – 300Ah

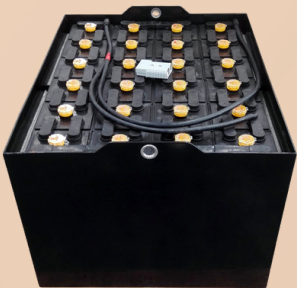

ESS Battery Rack Cabinet

Engineered for centralized energy storage, this high-capacity rack cabinet securely houses multiple lithium battery modules, ensuring efficient power management, superior ventilation, and reliable long-term performance.

Voltage: 48V / 51.2V

Capacity: 5kWh – 30kWh+

Traction Battery

Designed for electric mobility and industrial material handling, our traction batteries deliver high power output, extended runtime, and dependable performance for forklifts, pallet trucks, golf carts, and electric vehicles.

Voltage: 24V / 36V / 48V / 72V / 80V

Capacity: 150Ah – 1000Ah
